

Summertime Fun Layout PDF

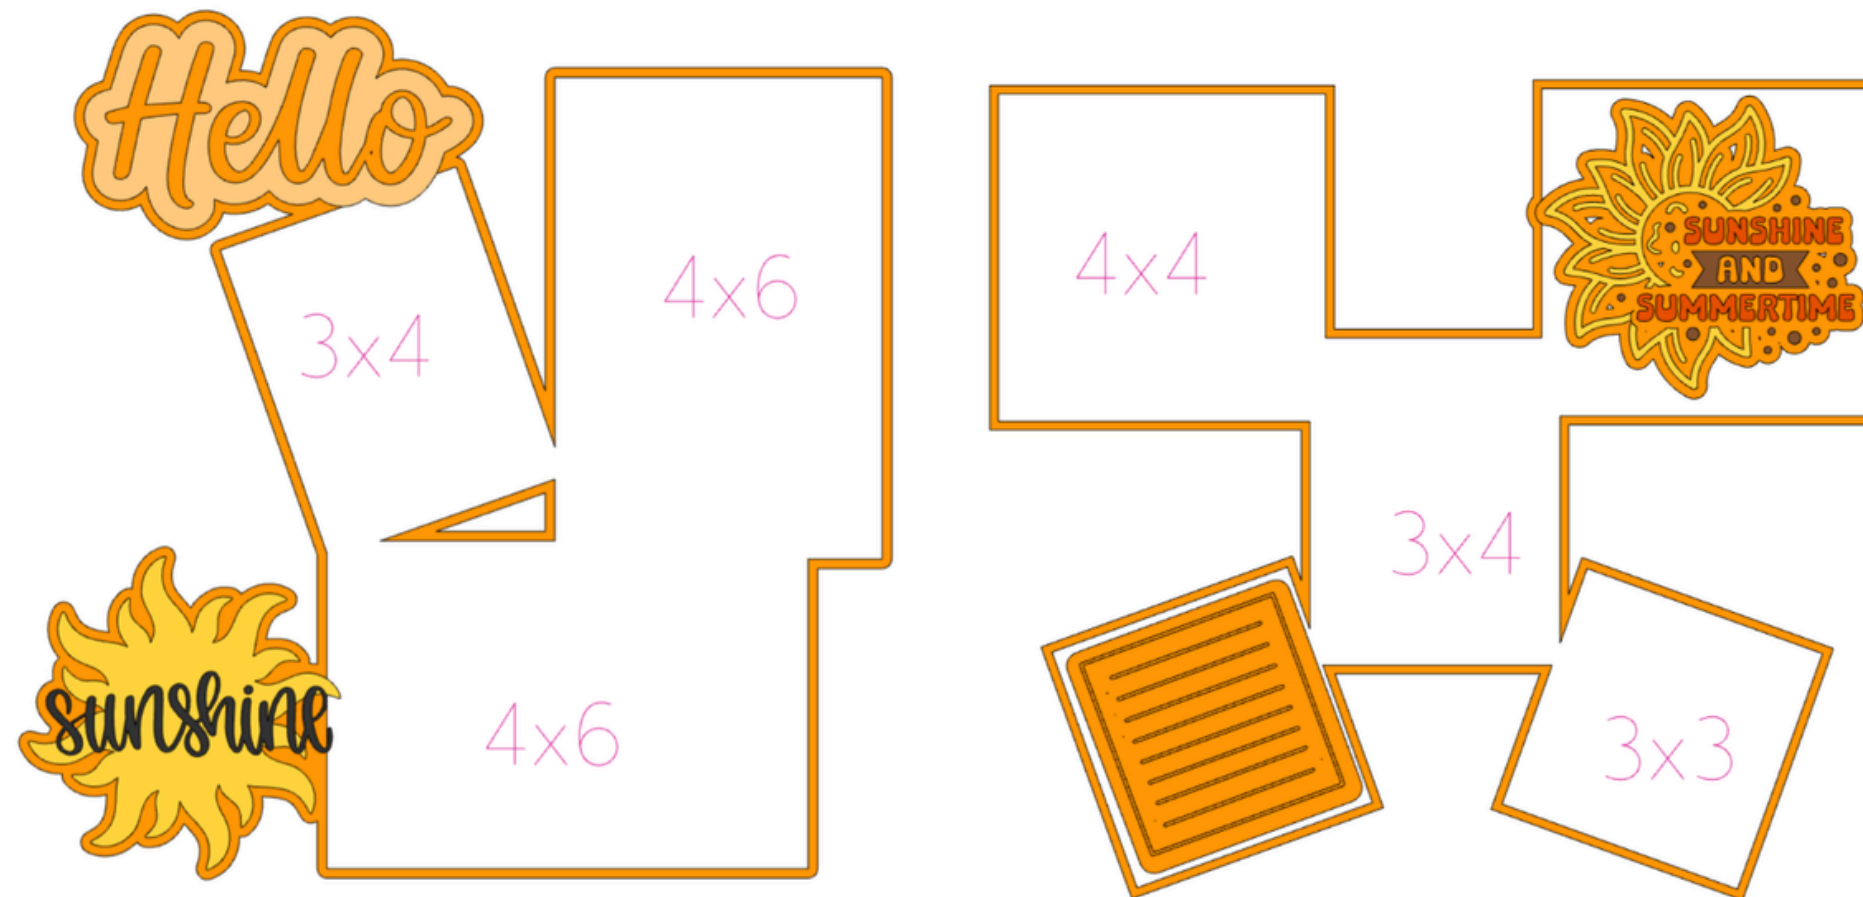

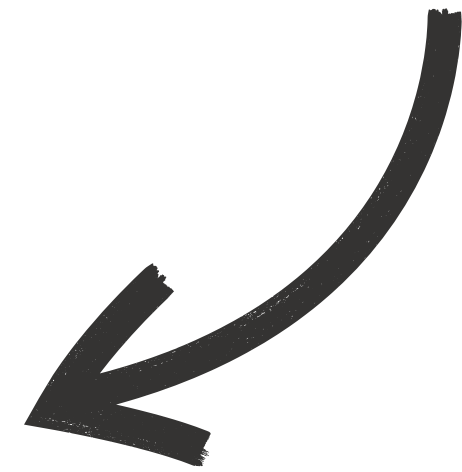

Step 1.) Open Your Project

Summertime Layout

This two page layout celebrates our Summer Fun!

<https://design.cricut.com/landing/project-detail/6a63d2b1af4020c3a2cc1e0f>

Click the Design Space project link below. We will save this to your projects after you are finished.

2.) Prepare your layout

Summertime Layout

Images, Fonts, and Cricut Access™ Features Used in this Project

- Cricut Sans
- List icon
- Sunflower graphic
- Black square
- sunshine (script)
- Sunflower graphic

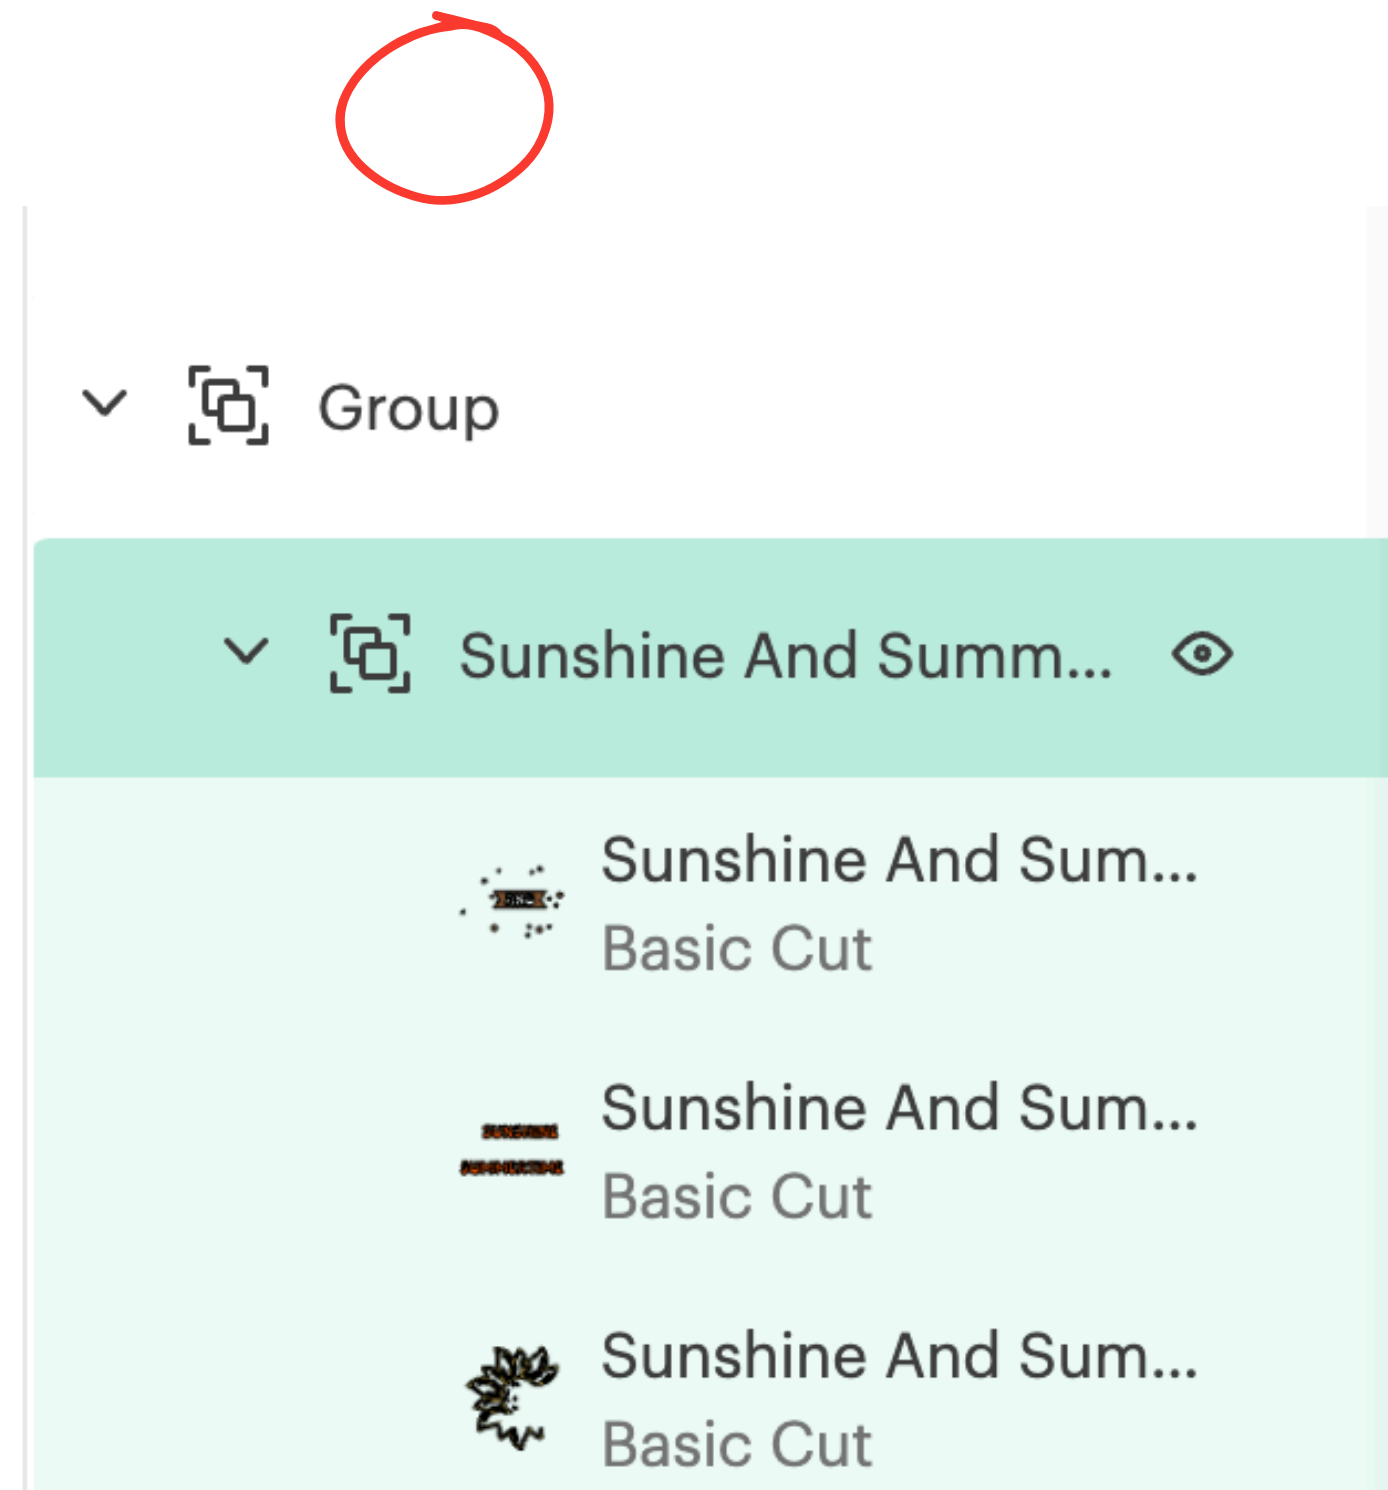

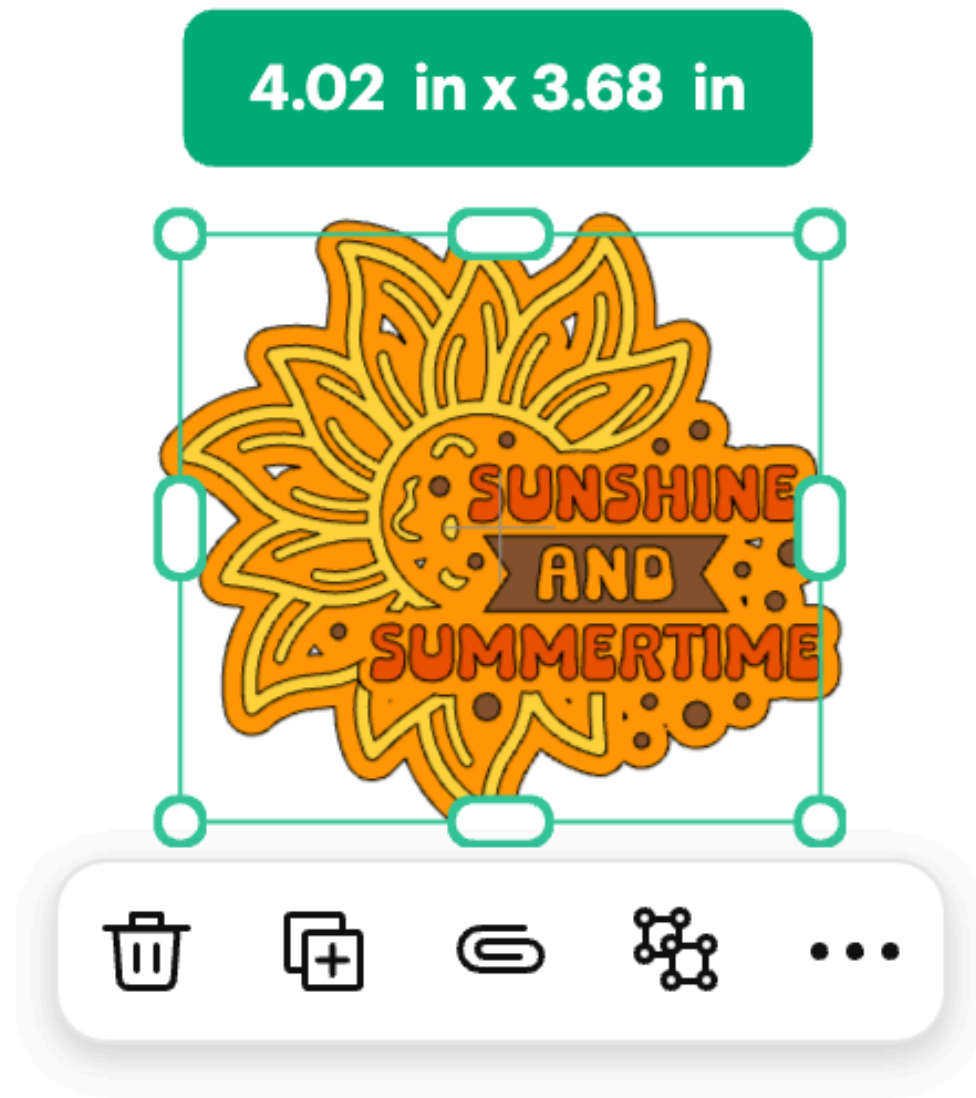

This project is currently private. Add photos any time, then share it to inspire others! [Add Photos](#)

[Customize](#) [Make It](#)

3.) Take a Look Around at all the layers and parts of layout

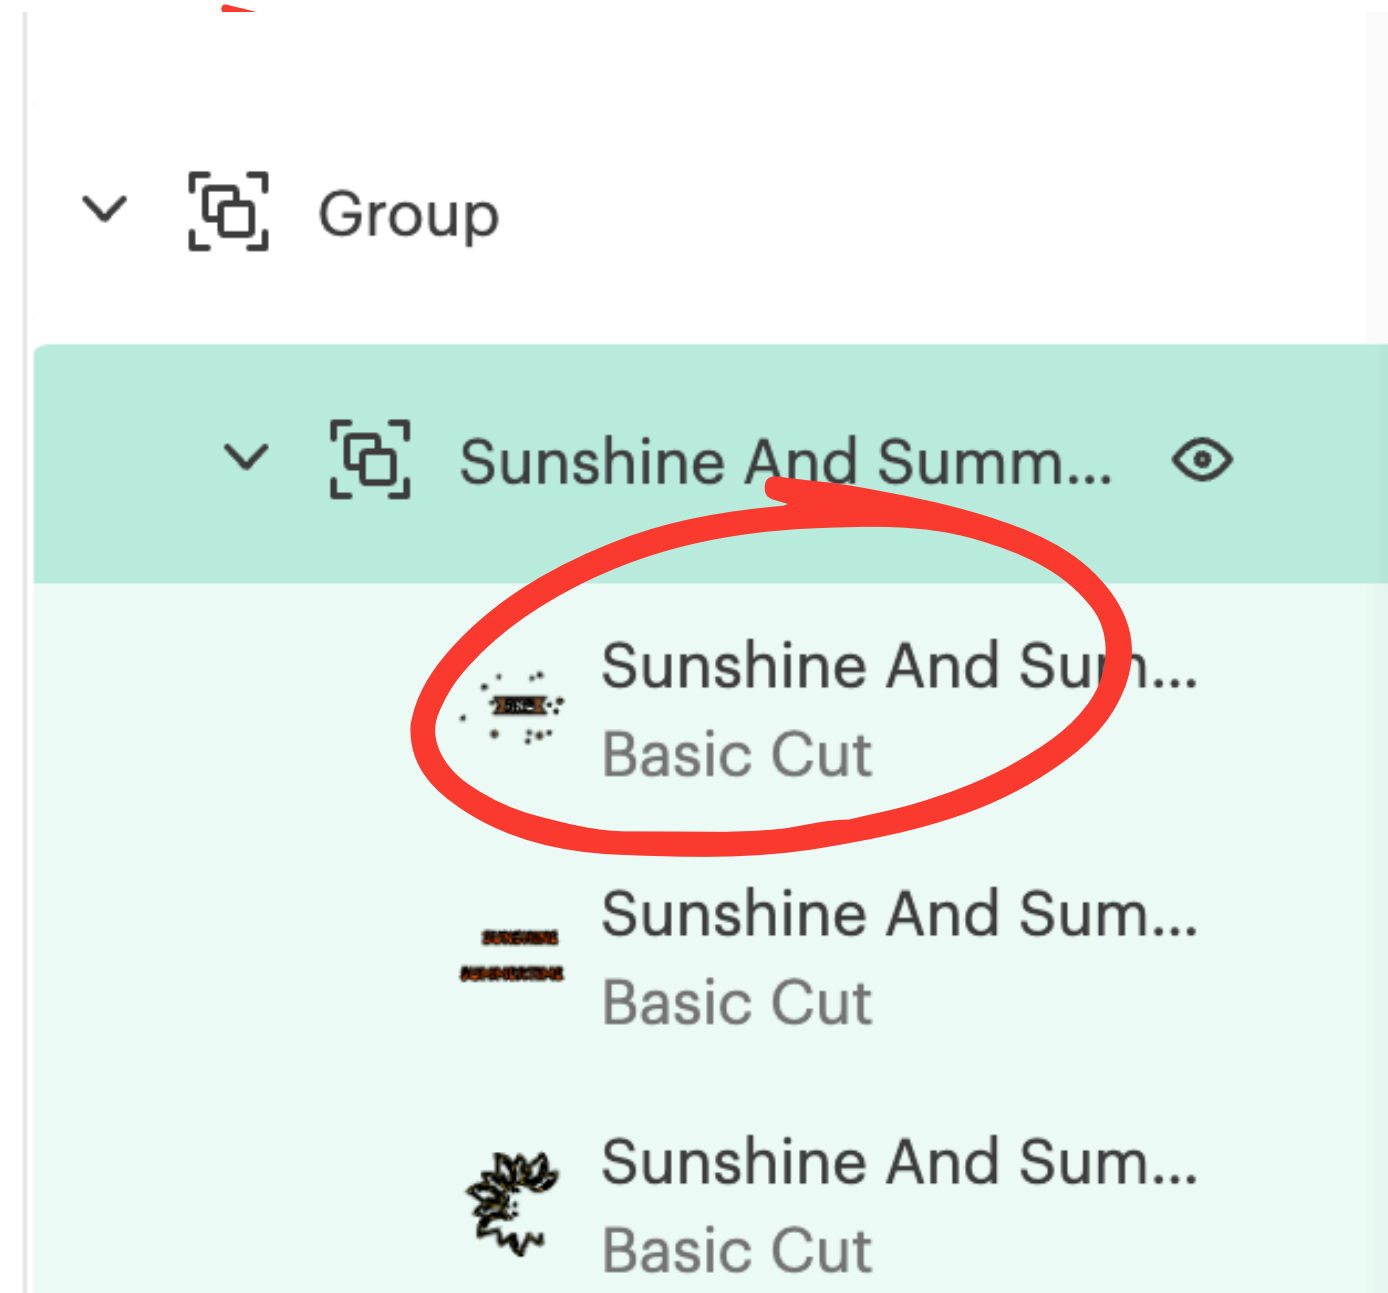

4.) Customize this Cricut embellishment

Ungroup this page of layout. Slide the grouped embellishment down.

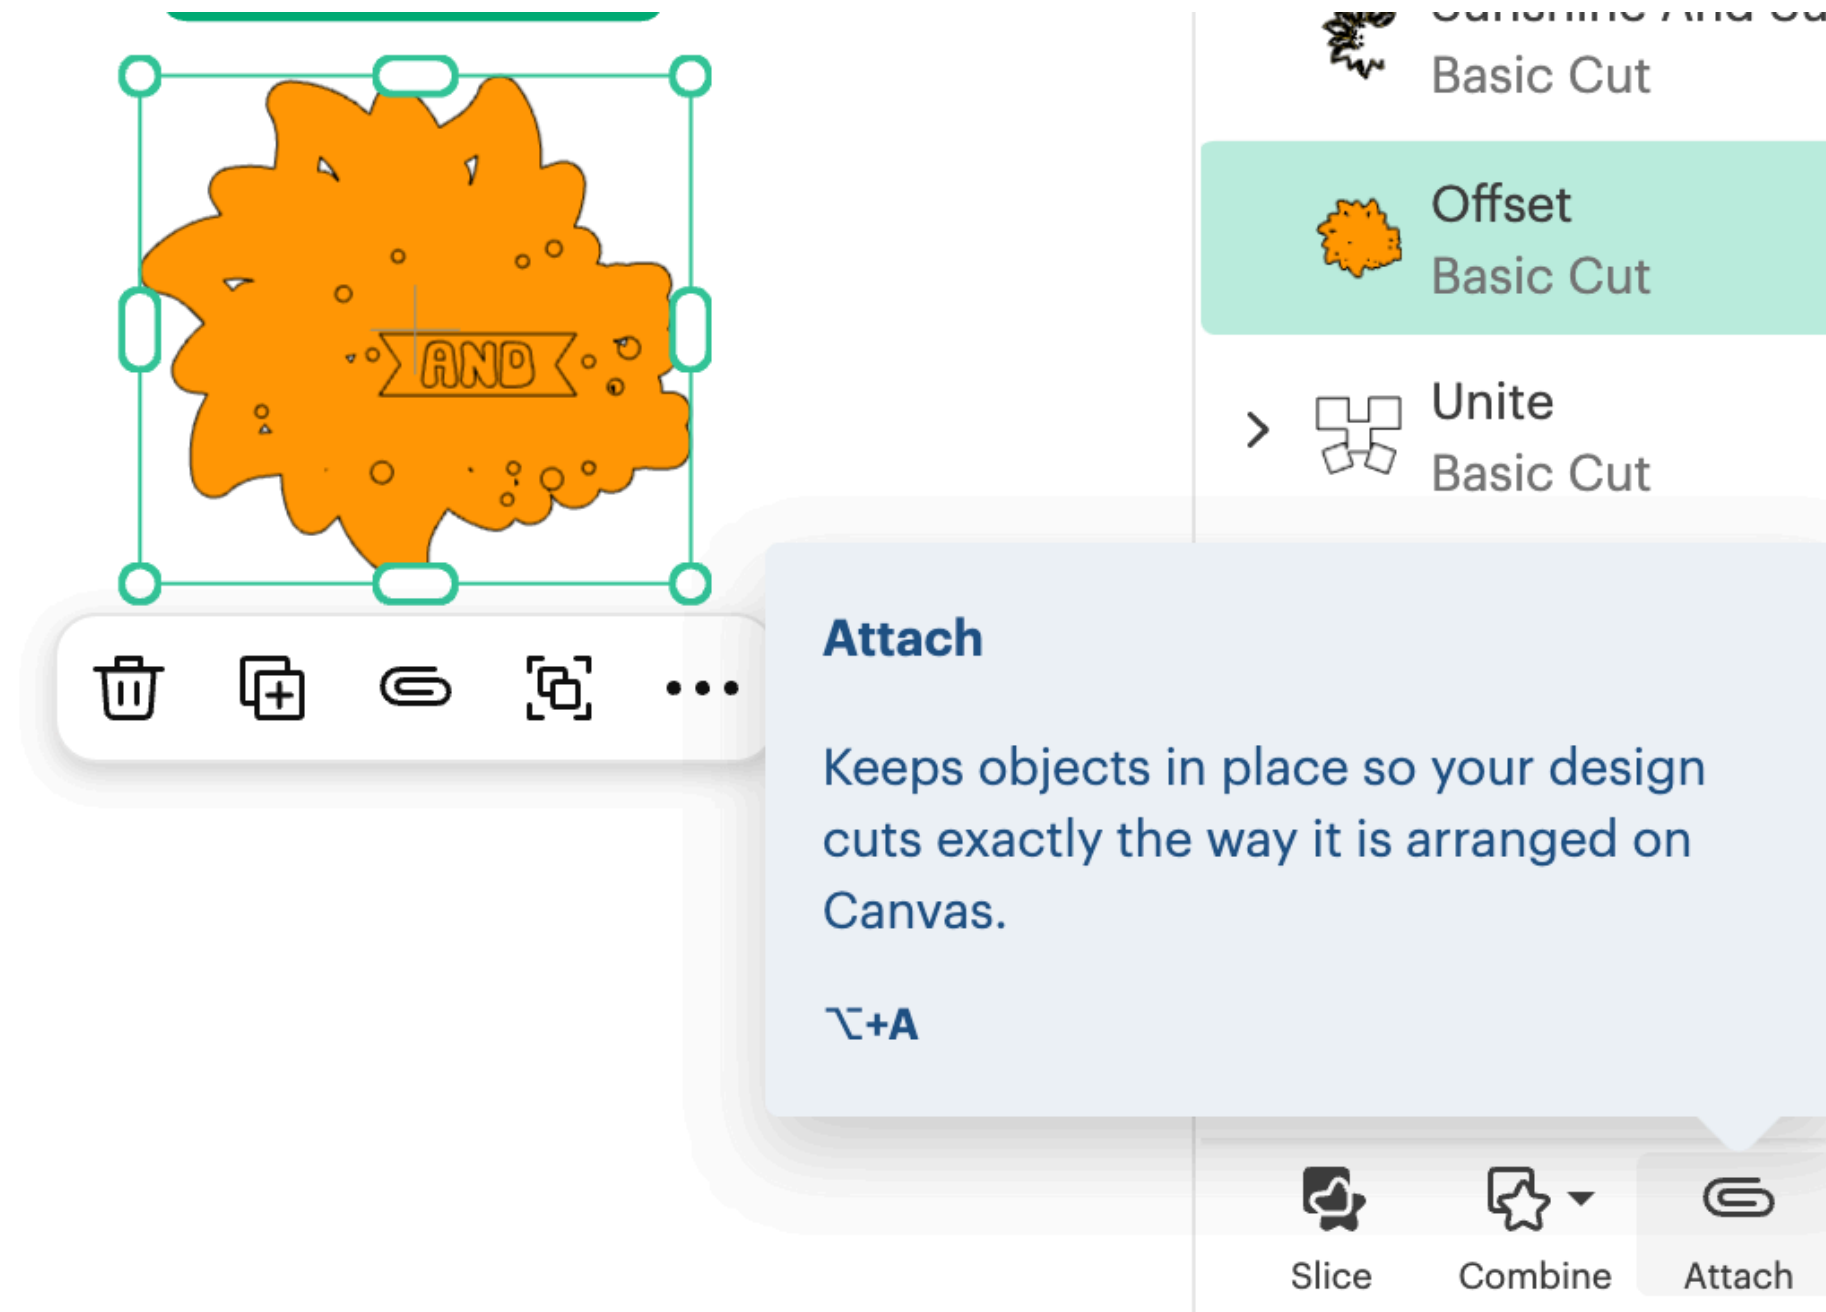

5.) Change part of the embellishment to make assembly easier.

Ungroup this embellishment and select the top layer
Change that from CUT to DRAW and you can then color in the
teeny circles after Cricut does the writing.

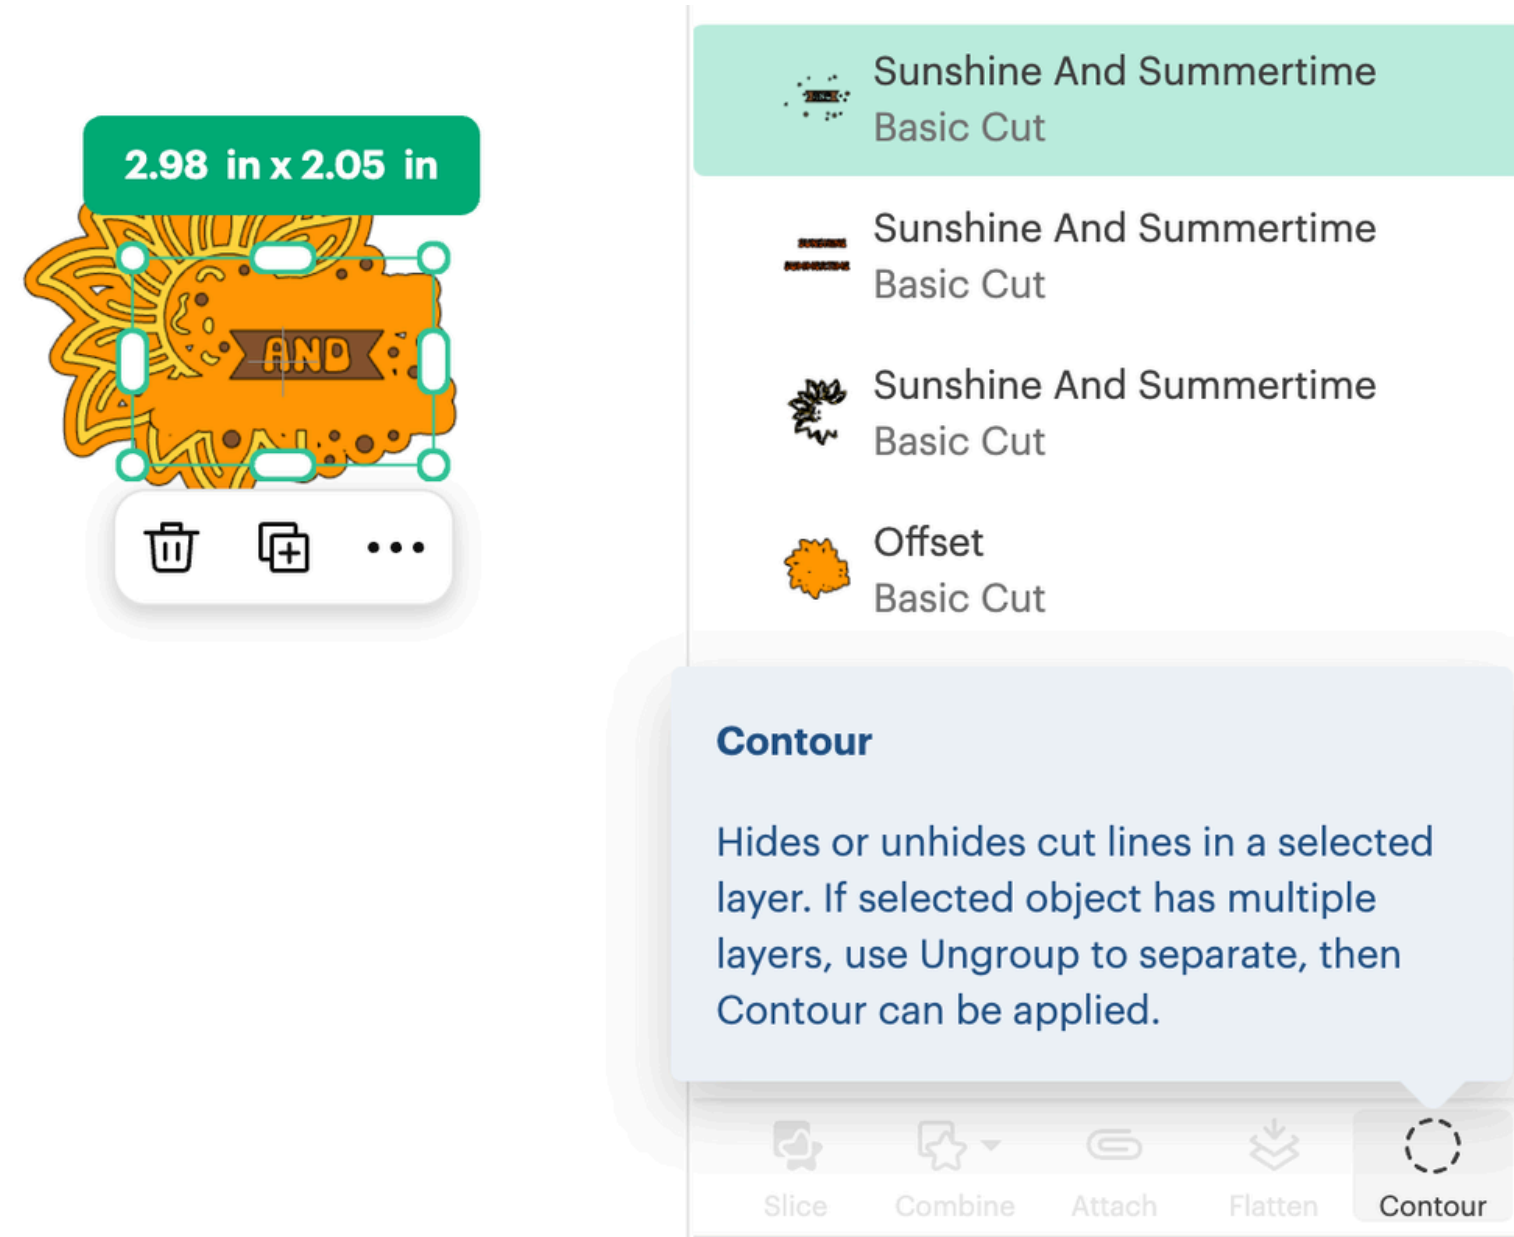

6.) You need to tell Cricut where to draw this layer.
Select the Draw Layer and the Offset layer and

ATTACH

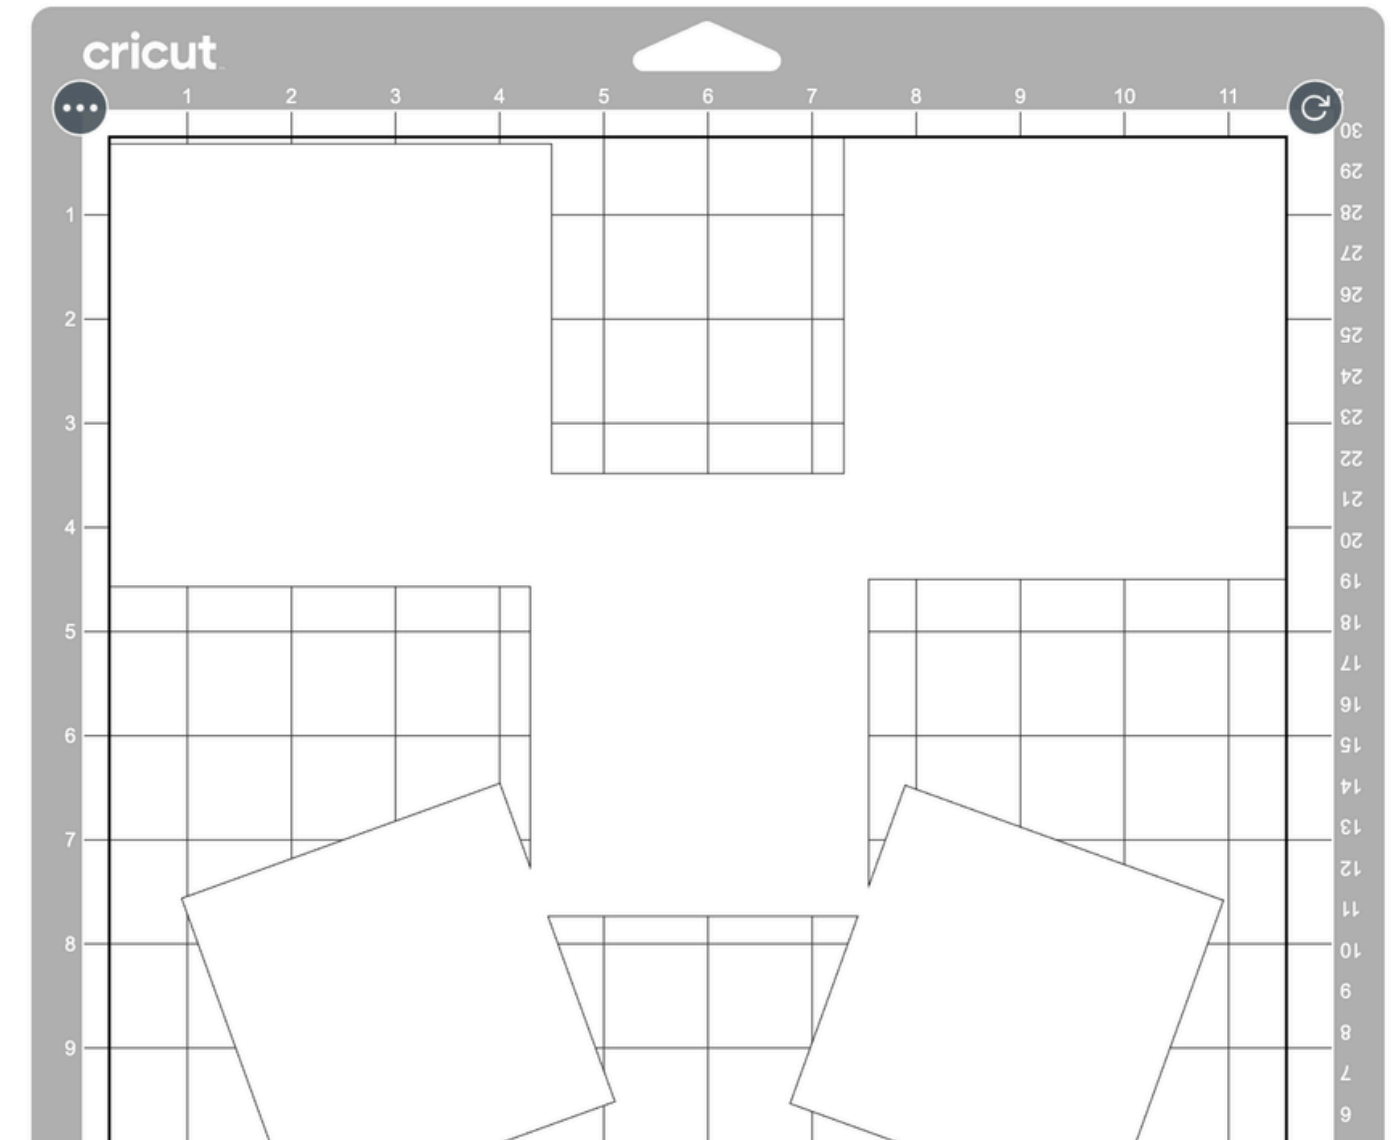

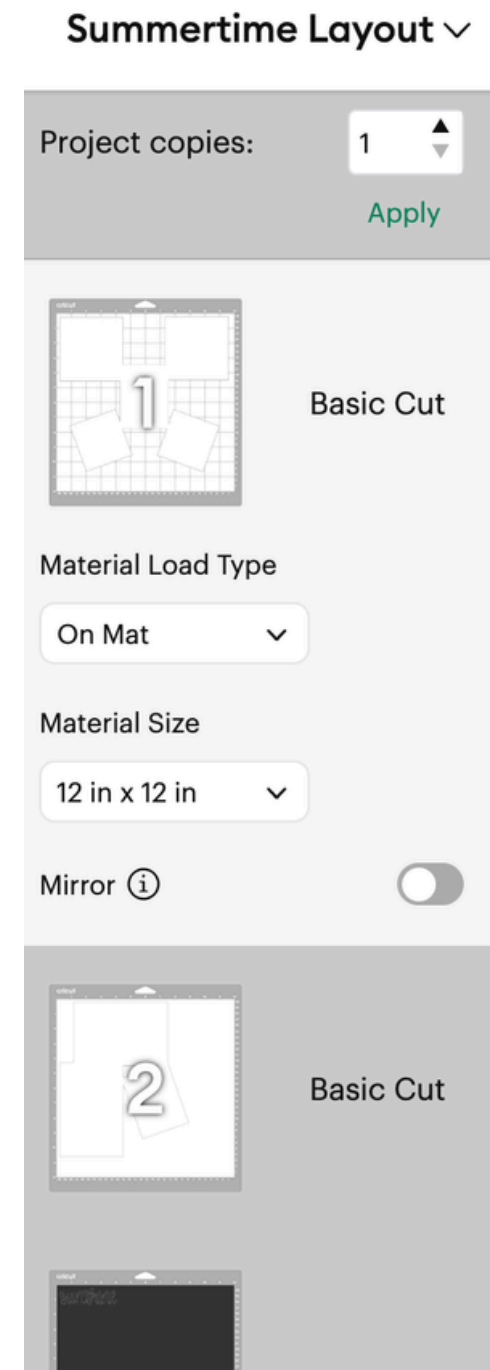

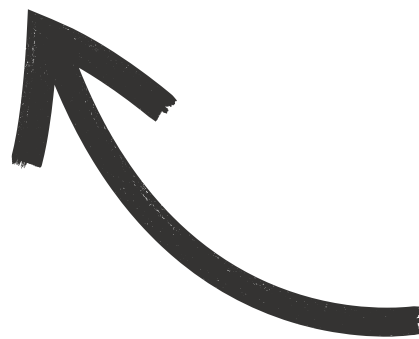

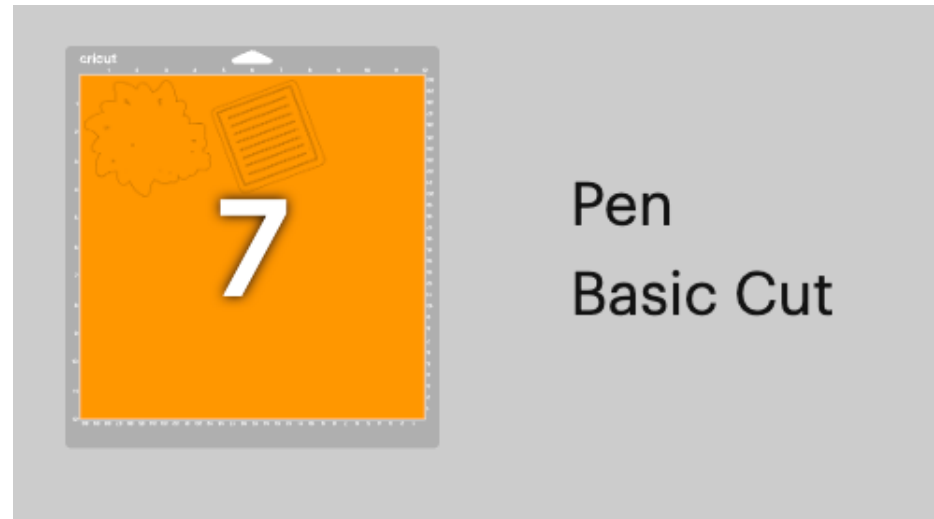

7.) You can use your own glimmer dots or STICKLES!! by using the CONTOUR feature. Select the layer with AND and the circles.

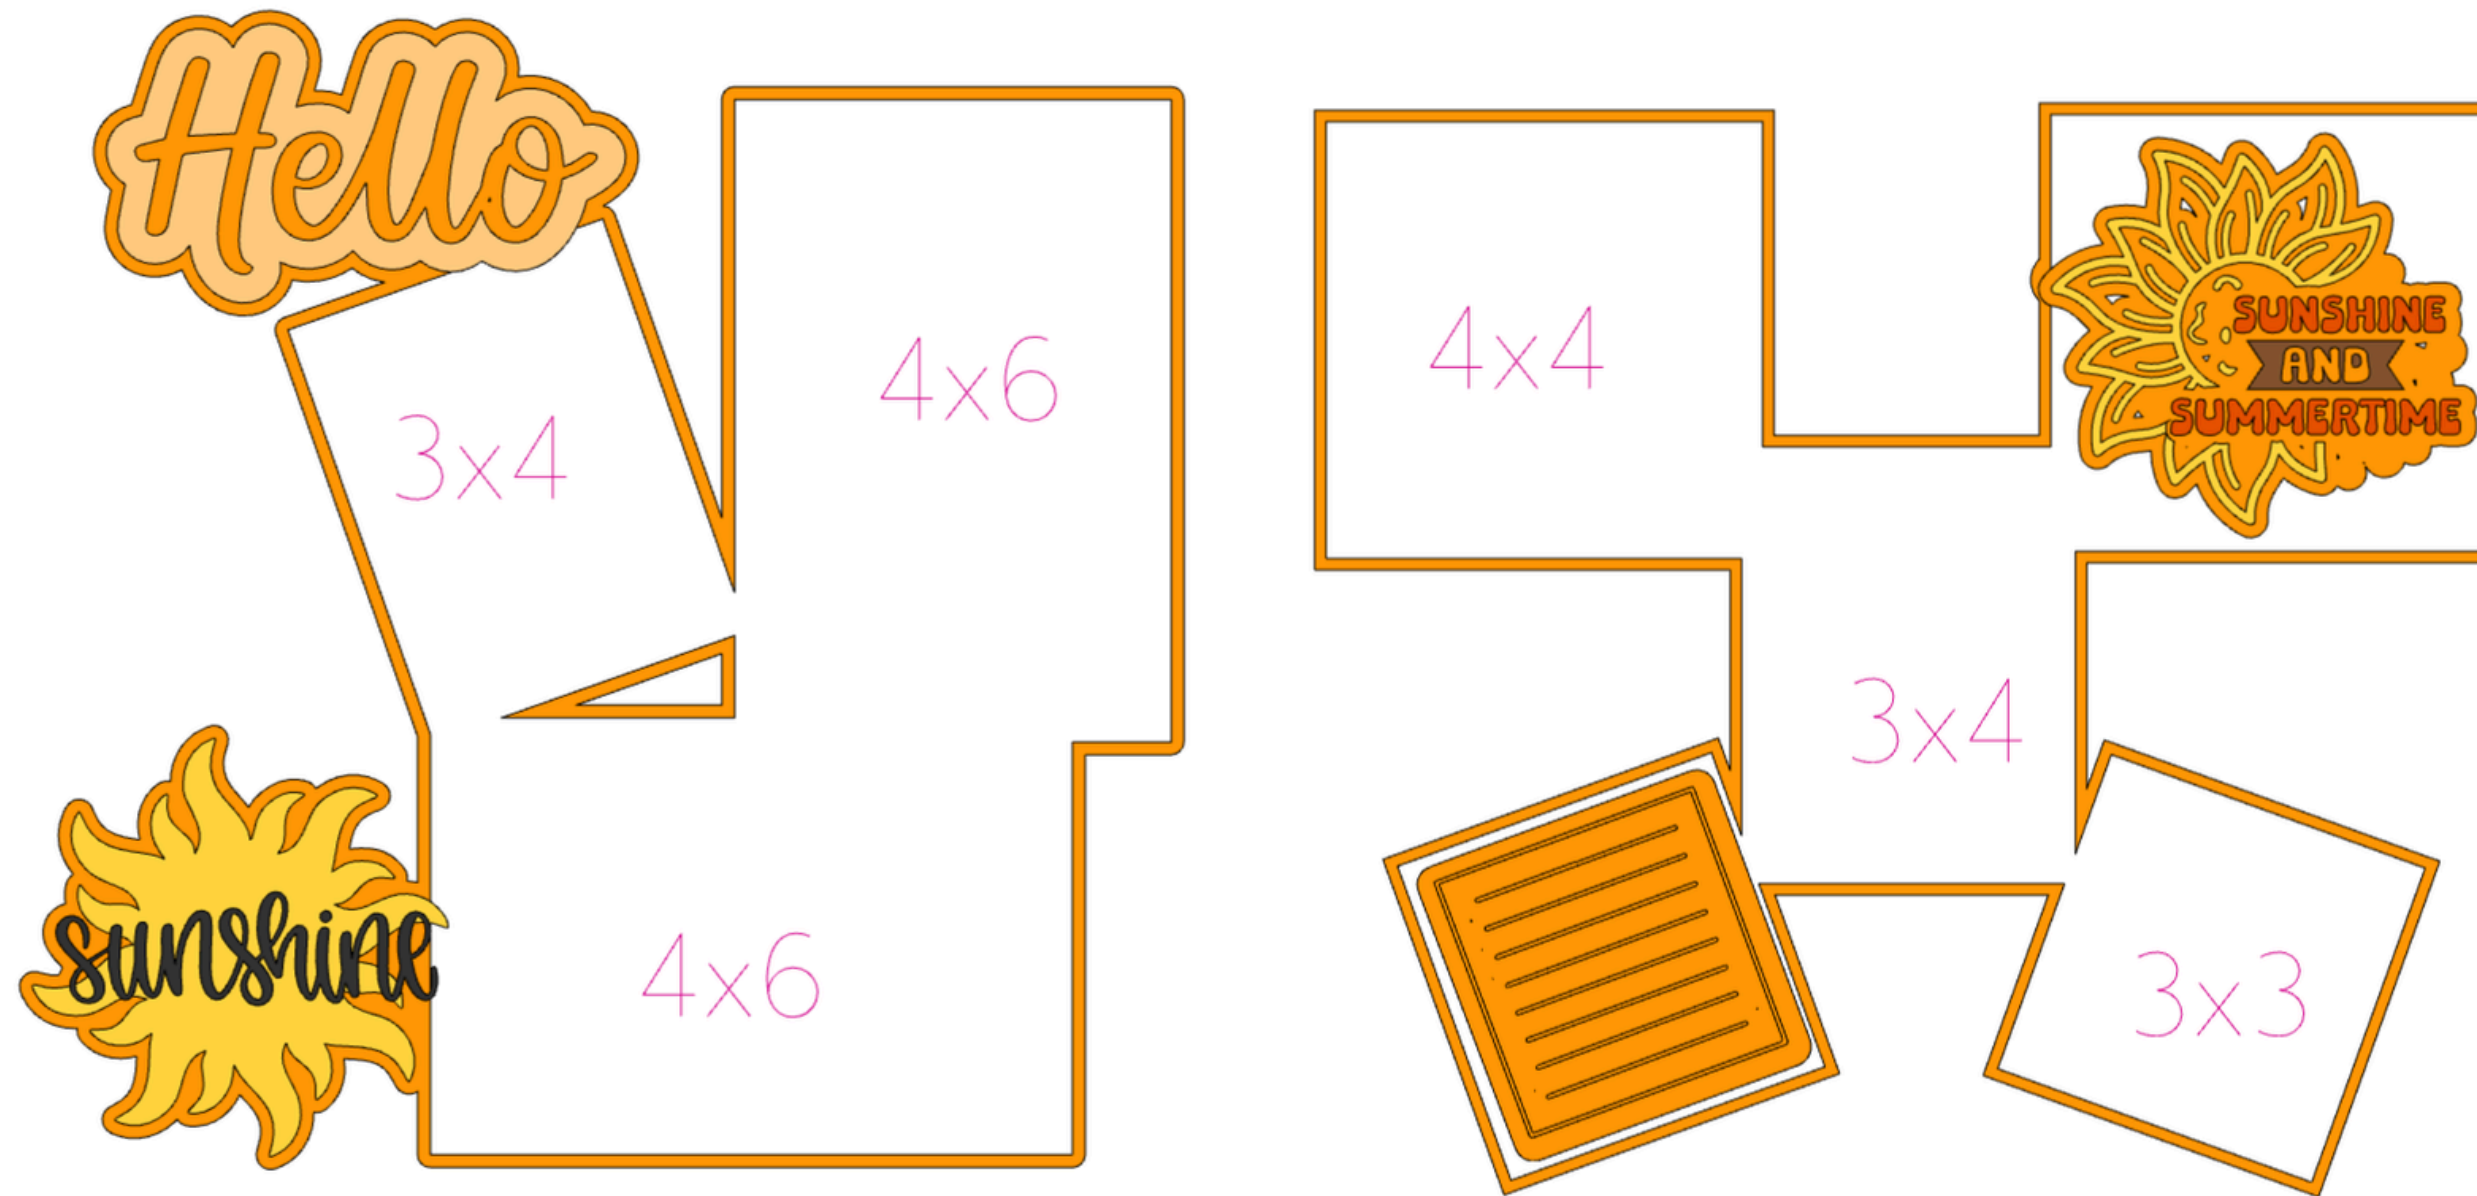

Everything look like you want it to?
You are ready to MAKE IT

8.) Let Cricut do the cutting!

Cricut cuts by color so you will see what color to load in the machine.
Note that Cricut will need a PEN on that load of the mat too.

9.) After cutting, return to your Design Space project to see how your layout layers go together

10.) Cricut will have saved your project as you go, but you can change the title if you wish.
